

# HOW TO DOWNLOAD YOUTUBE VIDEOS

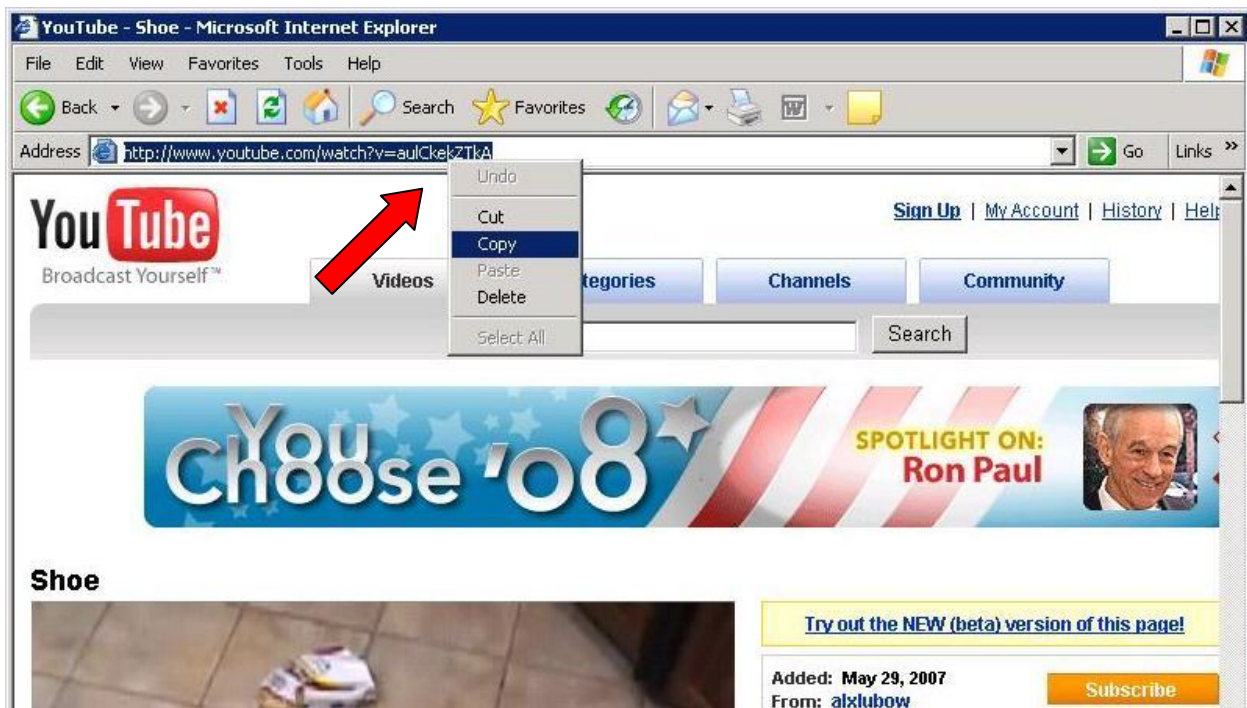

**\*PLEASE NOTE\***: You will not be able to access YouTube from the school network, this must be done on your home computer. The resulting video file will play on your classroom computer.

These instructions will help you download videos you find on YouTube.

1. Go to <http://www.youtube.com> and find a video you want to download. Make sure you are on the page where the video is playing:

2. Highlight the Address of the page, and then right click on the highlighted text and select copy:

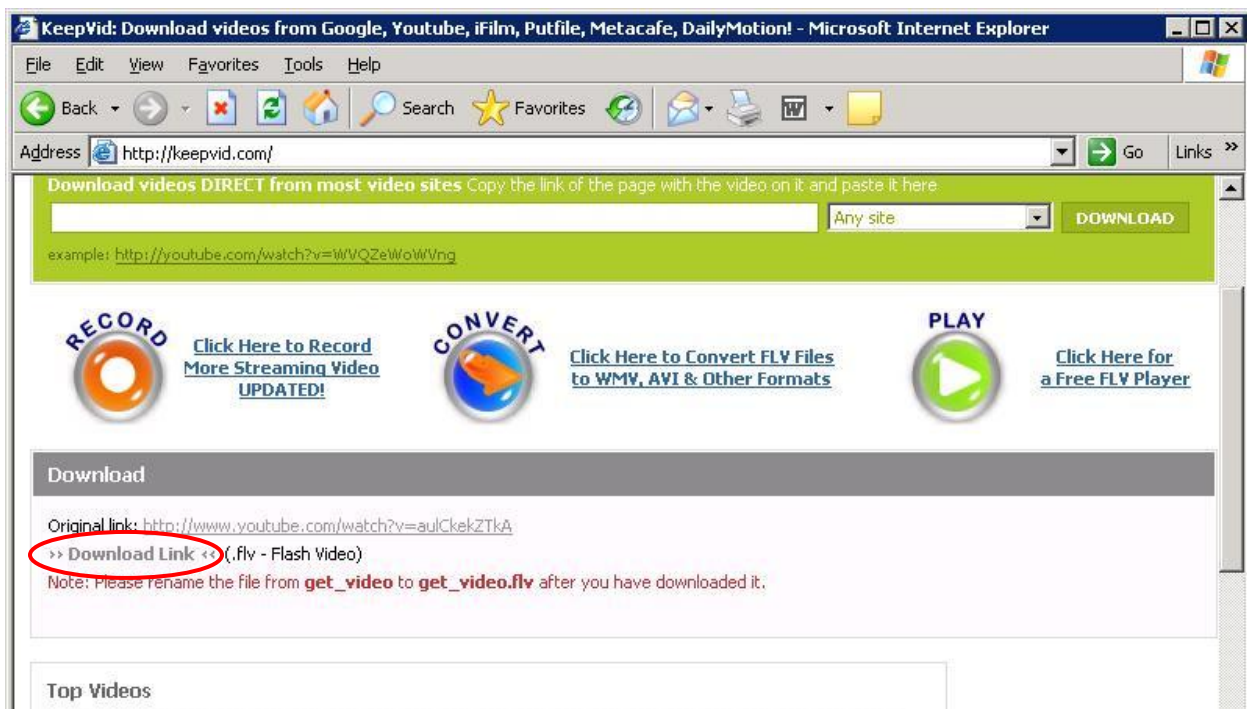

3. Go to <http://www.Keepvid.com> and right click in the blank area under "Download videos DIRECT from most video sites..." and select Paste:

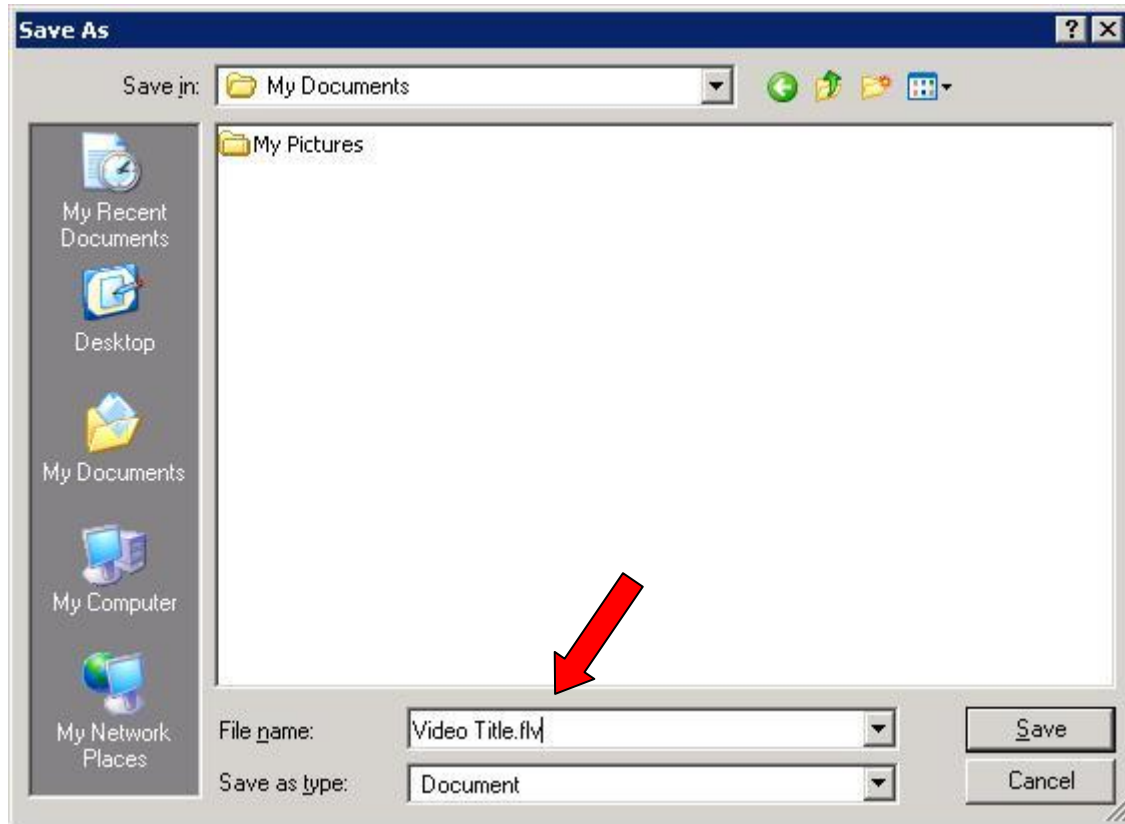

4. Now hit the Download button as shown in the red circle:

5. You will now be able to download the video by clicking the Download Link:

6. When saving, make sure to give the video a name you will recognize later, and you must put “.flv” at the end of the filename, as shown:

7. Once saved, you will be able to bring the movie file to your school computer by means of a USB drive or burned CD. The video file might not play on your home computer, but it will play on your classroom computer.
